BioSafe Biological Odor Control
Disinfectant and Deodorizer

Bio-Safe’s Air Disinfecting System generates tri-atomic oxygen that kills bacteria and viruses, while eliminating unwanted odors in the air.

Using only electricity, the air disinfecting process is powerful enough to provide disinfection and biofilm control, yet safe and simple for everyday use in residential, commercial, and industrial environments to eliminate odors.

Bio-Safe's Air Disinfecting System has been tested by the Environmental Protection Agency (EPA) and the Food and Drug Administration (FDA). It’s cleaning, disinfecting, and deodorizing methods demonstrate a >7 Log Reduction or a kill rate of 99.99999% of tested potentially harmful pathogens including E. coli, Salmonella, C. difficile, Staphylococcus Aureus (MRSA), Listeria, and Norovirus.

Applications

For use as a disinfectant and deodorizer in a wide variety of industries, vertical markets, and applications.

- Commercial Offices
- Restaurants
- Educational/Athletic Facilities
- Fitness Centers
- Hotels/Cruise Lines
- Motels and Small Hotels
- Packaged Food Industry
- Healthcare/Medical Facilities
- Industrial/Manufacturing Plants
- Senior/Assisted Living Facilities
- Military Institutions

Benefits to the User

- Odor-Free Environment
- No Air Fresheners or Filters to Buy
- 80% Savings in Deodorizing Methods
- Unique Industry Technology
- Safe, Economical, User-friendly
- FDA and USDA Approved
- EPA Registered
- U.S. Patented Processes & Technology

System Features

- Delivers On-site, On-demand Oxygenated Air
- Decontaminates Indoor Air & Surfaces
- Removes Biological, Chemical, & Physical Microorganisms
- Single Unit Treats up to 50,000 Cu. Ft.
- Compact Modular Unit Weighs Less than 10 lbs.
- Includes Automatic Timer for Operational Control
- Turnkey and Ready to Operate
