BioSafe Engineered Water Cleaner & Sanitizer

Converts municipal water into a powerful contaminant-removing, bacteria-killing agent.

Simple, effective, and cost effective, the BioSafe Cleaning Solution is produced on demand and on site using only cold water. The BioSafe Solution converts municipal water into a powerful contaminant-removing, bacteria-killing agent that cleans and sanitizes without the use of chemicals. The engineered water destroys all microorganisms and is a powerful biofilm, fiber, and surface control agent used to disinfect and clean virtually any environment.

The BioSafe Laundry Machine Solution produces an Oxidized Water that's MORE POWERFUL THAN BLEACH and safer to use. These Laundry Machine Units treat both Hot and Cold Water to clean all laundry items more effectively than traditional cleaning/bleaching methods.

Applications

For use as a Laundry Machine Cleaning Agent in a wide variety of applications:

- Hotels/Hospitality
- Educational and Athletic Facilities
- Healthcare/Medical Facilities
- Fitness Centers
- Cruise Lines
- Military Institutions
- Assisted Living/Senior Care Facilities
- Day Care Facilities
- Food Processing Plants

Benefits to the User

- More Powerful than Bleach and Safer
- Treats both Hot and Cold Water
- Reduces bleach/detergent costs by up to 93%
- Cuts Energy Costs by up to 45%
- Saves up to 50% of Linen Replacement Costs
- Reduces potential Skin Reactions
- FDA and USDA Tested and Approved
- EPA Registered
- Safe to Use

System Features

- On-site, On-demand Units requiring simply Tap Water and Electricity
- Produces ORP (Oxidation Reduction Potential) of 875-925 mV
- Modular Units available for Residential, Commercial, and Industrial application
- Generates 2 Gallons-per-Minute (GPM)-Residential Units, 5 GPM-Commercial Units, and 10 GPM-Industrial Units
- Turnkey and Ready to Operate
