

BioSafe Engineered Water Disinfectant & Cleaner

Converts municipal water into a powerful contaminant-removing, bacteria-killing agent.

Simple, effective, and cost effective, the BioSafe Cleaning Solution is produced on demand and on site using only cold water. The BioSafe Solution converts municipal water into a powerful contaminant-removing, bacteria-killing agent that cleans and sanitizes without the use of chemicals. The engineered water destroys all microorganisms and is a powerful biofilm, fiber, and surface control agent used to disinfect and clean virtually any environment.

The BioSafe Ice Machine Solution is more effective than all traditional filtering alternatives. BioSafe helps you establish a Pro-Active Ice Machine Program featuring a clean, bacteria-free ice machine and pure, clear, quality ice.

Applications

For use as a Disinfectant and Cleaner in Ice Machines in a variety of applications:

- Restaurants
- Offices
- Hotels/Motels
- C-Stores
- Education/Athletic Facilities
- Healthcare/Medical
- Government/Military
- Casinos/Gaming
- Senior Assisted Living Facilities

Benefits to the User

- Prevents Bacteria and Mold Growth
- Prevents unwanted Bio-Film or "Slime" build-up in the Ice Storage bin
- Keeps Ice Consumers Safe from harmful Bacteria in the Ice
- Prevents Low Water Flow due to Mold and Calcium build up
- Saves 100% of the Cost of Ice Machine Filters
- FDA and USDA Tested and Approved
- EPA Registered
- Safe to Use

System Features

- Produces ORP (Oxidation Reduction Potential) of 875-925 mV
- On-site, On-Demand Units requiring only tap water and electricity
- Modular Units weigh less than 7 lbs and are 8" x 8" x 4"
- Inlet Pressure Range of up to 85 psi
- Turnkey and Ready to Operate
