

BioSafe Biological Cold Fogging Airborne and Surface Decontaminate

BioSafe’s Biological Cold Fogging solution utilizes NEW biocidal technology by neutralizing over 300 Molds, Viruses, Spores, Bacteria, Fungi, and Allergens that are either airborne or on any surface.

The “Gold Standard” for environmental hygiene programs, BioSafe’s Biological Cold Fogging process eliminates >7 log or 99.99999% of nine of the most common potentially harmful microorganisms including E. coli, Salmonella, C. difficile, Staphylococcus Aureus (MRSA), Listeria, Norovirus and Human Coronavirus.

BioSafe’s Biological Fogging Solution is non-toxic, leaves no chemical residue, is non-corrosive, is 100% biodegradable, and is environmentally safe.

Applications

For use as an airborne and surface decontaminant in a wide variety of industries, vertical markets, and applications.

- Commercial Offices
- Residential Homes
- Educational/Athletic Facilities
- Fitness Centers
- Hotels/Cruise Lines
- Motels and Small Hotels
- Automobile Sales and Rentals
- Healthcare/Medical Facilities
- Industrial/Manufacturing Plants
- Senior Assisted Living Facilities
- Commercial Cleaning Industry
- Casinos/Gaming

Benefits to the User

- Kills over 300 Harmful Pathogens
- 80% Savings in Costs for Disinfecting/Deodorizing
- Eliminates Airborne and Surface Odors
- Non-toxic & 100% Biodegradable
- Unique Industry Technology
- FDA and USDA Approved
- EPA Registered
- Environmentally Safe

System Features

- Delivered with NEW Biocidal Airborne Technology
- Portable Fogging Application using a Proprietary Solution
- Anti-Microbial Particles settle onto All Surfaces
- Minimal PPE Required
- Takes just Minutes to Apply
- Treated Areas Accessible in 10 Minutes
